Submission of a manuscript to the Jurnal Ekonomi & Studi Pembangunan

(04 October 2023)

Dear Editor of Jurnal Ekonomi & Studi Pembangunan,

I wish to submit an original research article entitled “Shariah Board Governance and Sustainability Performance: Analysis of Sharia Banking in Indonesia” for consideration by Jurnal Ekonomi & Studi Pembangunan.

I confirm that the paper is my own work with the support from the Indonesian Economist Association (ISEI).

This paper provides description and analysis of the relationship between sharia governance and sustainability performance in Indonesia Islamic banking industry. As the issue of corporate governance (CG) is still an interesting topic to be studied, the issue of sustainability or corporate sustainability is also a topic that has increased attention globally. Either way, sustainable growth as a long-term goal is an important pillar that must be owned by companies including Islamic Banking (IB). Previous research has proven that the role of syariah supervision has a positive impact on IB performance. Many other studies related to the relationship between corporate governance and sustainability have been carried out, however, the relationship between sharia governance and sustainability performance in IB is still relatively small. This study strives to fill the gap by investigating the relationship between sharia governance and sustainability performance (SP) in Indonesia Islamic Banking. The findings are expected to enhance understanding to the development and in addressing sustainability-related issues of Islamic bank. This study also contributes as consideration in the improvement of standard practice or current implementation of sharia governance in Indonesia and to promote sustainable operations through Islamic corporate governance.

Thank you for your consideration of this manuscript to be published on Jurnal Ekonomi & Studi Pembangunan.

Sincerely,

Novia Dwi Puspitasari
