Dear Editor,

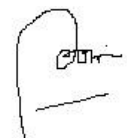

Submission of Manuscript to *Jurnal Ekonomi & Studi Pembangunan*

On behalf of co-authors and myself, I would like to submit the attached manuscript titled “The Role of Village Development on Stunting Prevalence Reduction in Eastern Indonesia” to be considered for publication in your esteemed journal.

Our research unveils a promising avenue for combating stunting in the eastern region of Indonesia by emphasizing the pivotal role of village development initiatives. Unlike previous studies that predominantly focused on individual-level interventions, this research underscores the collective impact of village-level advancements on stunting reduction. By employing the Generalized Least Squares method, the study elucidates how multifaceted village development, encompassing economic, social, and infrastructural dimensions, contributes to the acceleration of stunting alleviation efforts.

The authors of the paper are Romi Bhakti Hartarto, Intan Solikhah Indriana, Tiara Fadhila, and Gilang Adi Nugraha. The corresponding author is Romi Bhakti Hartarto. Please find the contact details below. This paper has not been published by or accepted for publication by any other journal. We will be grateful if you can reconsider the paper for potential publication in *Jurnal Ekonomi & Studi Pembangunan*.

Yours sincerely,

Romi Hartarto
